

NuTone[®]

CV850

CENTRAL VACUUM SYSTEMS

The CV850 works with the C1370 Series Indicating Inlets to conveniently remind the homeowner at the wall inlet location when it is time to change the filter bag in their power unit. Or a light on the CV850 also reminds homeowner of the system's status.

NuTone Advantage Series Power Units – an important part of Total Indoor Air Quality...solutions for today's lifestyles!

ADVANTAGE[®]

CV850 Advantage Series Large Capacity Power Unit

For maximum cleaning performance in larger homes or light commercial applications. Recommended for up to 12,000 sq. ft. With two parallel-mounted 3-stage motors, the CV850 packs more power in a compact package.

Green LED on power unit shows system ready for use; changes to amber after 25 hours of operation to remind homeowner to replace dirt filtration bag. Resets with rocker switch on power unit; gold plated contacts for added reliability. Large 8-gallon capacity, replaceable bag filtration. Includes two mufflers.

FEATURES:

- Two, 3-stage bypass motors
- Reduced sound levels
- System status indicator light
- 8-gallon dirt receptacle capacity (Replacement bags, model 391-8, pack of three)
- UL Listed
- Two Year Warranty
