

IRON-A-WAY[®]

Built-In Ironing Centers

**The old is new again in ironing.
Discover why IRON-A-WAY is chosen
more often by those who demand
unmatched quality and convenience
in a built-in ironing center.**

IRON-A-WAY®

Built-In Ironing Centers

Top of the line, Model A-46 is professionally designed to include the most premium set of features, allowing for the utmost ease and comfort when ironing. The telescoping steel support legs provide the rugged stability necessary when ironing with the superlative 46-inch length board. A 4-inch height adjustment lets you choose the most comfortable work position. A solid state, silent timer turns on power to the built-in work light and the electrical outlet. The electrical cord cover and restraints help guide the cord over the board, eliminating potential snags. You can leave your iron plugged in at all times, even when the door is closed. A built-in safety switch disconnects all power when the board is returned to the upright position.

The oversized hot iron storage compartment, iron rest, storage shelves, garment bar, and indicator light are the standard accessories completing this *supreme* ironing center.

... no place to leave your iron when moving or turning your garment?

Place the iron in this handy heat resistant iron rest. This allows for more useable space on the ironing board while making your garment adjustments.

A-46

... looking for the optimal freedom in board usage?

Add the optional swivel board. The premium length board coupled with the adjustable swivel creates the overall maximum flexibility that you would want in an ironing board.

The Model A-42 is skillfully designed with a 90 degree left/right, industry standard 42-inch, ventilated steel swivel board, giving flexibility in confined areas like corners in the laundry room or kitchen. Its easy 4-inch height adjustment automatically returns to its normal ironing board position every time the board is put away.

The solid-state silent timer, premium sized hot iron storage compartment, built-in work light, storage shelves, electrical cord wrap, and on/off indicator light are the outstanding standard accessories that complete this ultimate ironing center.

No reason to worry if you're temporarily called away or unable to continue your ironing!

The solid-state, silent timer offers safety and convenience on the Model A-42 and Model A-46. Just set the dial to the desired time. The on/off indicator will let you know the power is on. Power shuts off automatically once the time has expired. If you're called away, just place your hot iron into the hot iron storage and lift the board into the upright position, the electrical safety switch disconnects power instantly.

Allow for only the amount of cord required to iron by using the electrical cord wrap. You can then easily guide the iron and eliminate the excess cord from getting in your way.

A-42

... more than just a few garments to iron.

Order the optional garment bar rather than the standard garment hook. The garment bar can hold multiple clothes hangers, making it more convenient to perform continuous ironing.

IRONAWAY®

Built-In Ironing Centers

The Model E-342 has been expertly designed to only include core components and any additional features are optional. What sets this unit apart from the others is you can design the perfect ironing center to fit your needs.

The cabinet houses a premium sized hot iron storage compartment, storage shelf, an appliance outlet, an on/off illuminated rocker switch, and an industry standard 42-inch, ventilated steel board. Now you just add any or all remaining features to customize your ultimate built-in ironing center.

Do you want to create an environment that provides optimal surroundings when ironing out all the wrinkles?

Add an optional spotlight. This will enhance your ability to iron out those sometimes hard to spot creases and crevices not found when ironing garments in insufficiently lit areas.

E-342

Storage is not a problem with our ironing centers!

All models will include an additional storage shelf, our premium A-46 cabinet will include two storage shelves.

Keep all your ironing aids in one handy location!

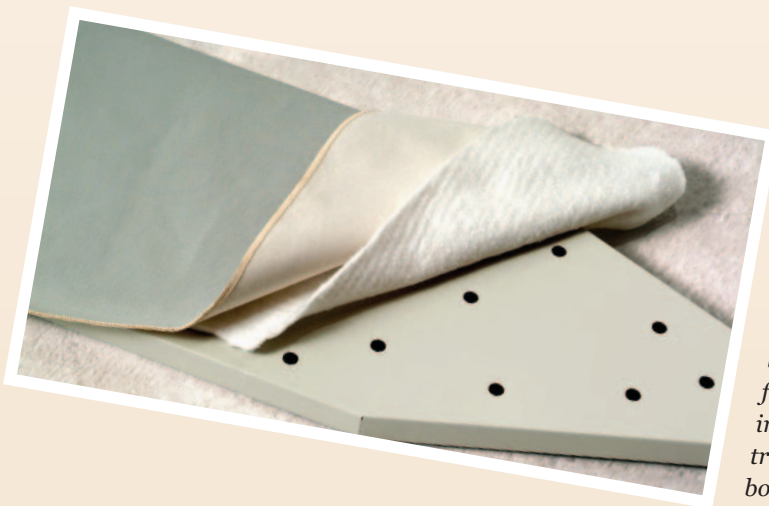

The Model NE-342 is just what you need if an electrical outlet is easily accessible. Built with all the same quality materials as our electric models.

The NE-342 features a premium sized hot iron storage compartment, storage shelf, and a rugged 42-inch ironing board made of ventilated steel.

Not only is it convenient to store your iron inside the unit, but the location keeps the iron out of children's reach.

There's no reason to let your iron cool down, the insulated heat shield allows for immediate shelving.

Our metal ventilated board differentiates itself from the earlier wooden ironing boards. The traditional built-in wooden board only needed to be hard for the dry irons of the

day. Today's advanced steam irons are designed to project bursts of steam to penetrate deep into the fabric. Using them on a wooden ironing board causes condensation on the board and hot spots when ironing. Our metal ventilated board allows this steam to pass through the fabric keeping the surface drier and providing a more even-heated ironing surface.

NE-342

IRON-A-WAY®

Built-In Ironing Centers

The Model NE-242 is a surfaced mounted, non-electrical unit. Perfect for areas where you want to iron, but the wall/surface can not be penetrated for recess mounting. You have fast access to your ironing board, without in-cabinet iron storage. This quality built model comes with a rugged 42-inch, ventilated steel ironing board.

The swivel feature is available for this surface mount unit. The feature does not include a 4" height adjustment, but it creates the flexibility that may be necessary in confined areas.

NE-242

Ordering a NE-242 with a white door, the cabinet has a white interior as well as a white exterior. This compliments many of the closets system in the market today.
