The Cylonic Difference

VACUFLO® features Cylonic® Filtration Technology™ (CFT™), a unique dual-filtration process that utilizes cyclonic separation for primary filtration and either an outdoor exhaust (True Cylonic® units) or pleated filter (Filtered Cylonic™ units) for secondary filtration.

Unlike central vacuum systems that rely on permanent cloth filters, the powerful performance of VACUFLO will not decrease as dirt accumulates.

If you’re serious about eliminating dirt and allergens from your home, there’s only one choice: VACUFLO.

Cyclonic Filtration Technology®

Filtering a stream of air and vacuumed debris, CFT™ creates a powerful centrifugal force that separates the debris from the airflow and forces 96-98% of all vacuumed dirt into the dirt canister. Fine dust particles are exhausted outside (True Cylonic® units) or trapped in and filtered by a pleated filter (Filtered Cylonic™ units) for secondary filtration.

VACUFLO® SYSTEMS ARE IDEAL FOR NEW OR EXISTING HOMES

A VACUFLO system can be installed in any home, regardless of its size or design. The resulting cleaning performance is efficient, powerful and proven. VACUFLO simply transports all vacuumed dirt and dust particles through a network of in-wall tubing directly to the power unit for cyclonic separation and elimination.

Installation of a VACUFLO system usually takes just one day, and no structural modifications are needed.

For maximum convenience and whole-house coverage, inlet valves are strategically placed throughout the home. To ensure the cleanest and quietest living space, the power unit is located in a remote area, typically the basement, garage, crawl space or utility room.

* ASTM recognizes air watts as air power and is defined as “above the floor cleaning potential.”

**Maximum amps refer to the potential amount of current if the power unit is running in a stand-alone situation (no tubing or accessories attached).

Average amps refer to the actual amount of current used when the power unit is in typical operation (installed, with accessories attached).

*** ASTM draft F11.50.07 test method was used to determine dB A ratings. Sound levels were measured at 6’ from the power unit. All power units were exhausted outdoors.

Environments for Living is a registered service mark of Masco Contractor Services, Inc.
You probably take the quality of the air inside your home for granted. You assume it’s safe, clean and breathable. But the fact is, indoor air can be more polluted than outdoor air. There are several reasons. Today’s homes are sealed more tightly, locking in allergens like pet hair and dander. Synthetic building materials and furnishings can release chemicals and fumes. Household products are formulated with chemicals that can be harmful. Even clean homes can collect as much as 40 pounds of dust per year.

Since most of us spend 90% of our time indoors, poor indoor air quality can affect health, safety and comfort, especially in children and the elderly. According to the U.S. EPA, indoor air pollution is America’s most serious environmental health problem. The American College of Allergists also reports that 50% of all illnesses are caused by, or aggravated by, polluted indoor air.

You want to do the best for your family. So what is the best way to ensure a clean living environment? VACUFLO® Built-in Central Vacuum Systems eliminate 100% of vacuumed dirt, dust and allergens for cleaner air and a healthier home.

Most portable vacuum cleaners can leave behind odors and dust particles you can see. These particles and allergens are spread around your home and recirculated into the air you breathe.

The cyclonic power of VACUFLO eliminates odors and dust particles for a cleaner, healthier home.

Full-Service Warranty

VACUFLO’s Limited Lifetime Warranty covers all permanently installed components of your whole-house cleaning system for as long as you live in your home. The labor warranty offers additional protection, covering the cost of service calls made by your local VACUFLO Service Professional. True Cyclonic® +3 labor warranty covers service for the first three years of ownership, while the +1 Filtered Cyclonic® warranty covers labor for the first year.

Our unmatched warranty is our commitment to you—our promise to deliver a whole-house cleaning system designed to deliver reliable performance year after year.

Versatile Cleaning Accessories & Kits for Every Job in the House

VACUFLO’s cleaning accessories are designed to help you tackle big jobs with ease. From floor to ceiling, the garage to the family room, VACUFLO accessories deliver both convenience and powerful performance for hard surface flooring, rugs, walls, ceilings, draperies, upholstery and much more.

The Right Central Vacuum System for All Your Cleaning Needs

VACUFLO’s cyclonic vacuum units deliver powerful sustained cleaning performance, regardless of the size of home. VACUFLO’s exclusive Cyclonic Filtration Technology (CFT™) ensures you are cleaning with maximum vacuum performance every time you turn on the system.

You want to keep your home clean, quiet & healthy. Like keeping your home clean, quiet & healthy, whole-house cleaning convenience is essential. Put it all together for whole-house cleaning convenience.
